

**KARSAN OTOMOTİV SANAYİİ VE TİCARET A.Ş.**  
**ENERGY POLICY**

## **OUR ENERGY POLICY**

***Karsan Otomotiv Sanayii ve Ticaret A.Ş.(Karsan Automotive) is committed to reducing its energy consumption and costs and increasing its long-term environmental and economic sustainability. Acting on the principle "Save your energy for a rainy day", to achieve these goals, it is committed to;***

1. Continuously improving its energy performance by continuously reducing its energy consumption in its production and distribution activities,
2. Using information and resources effectively to achieve its goals and objectives,
3. Highlighting energy performance in purchasing decisions, product development, process design and facility design,
4. Implementing contingency plans to safeguard itself against power outages during production,
5. Encouraging its staff to use energy more efficiently in their work and when carrying out non-work activities,
6. Promoting the use of renewable energy sources (solar, wind, biomass energy, etc.),
7. Supporting energy programs and complying with all legal obligations and regulatory requirements related to energy consumption, use and efficiency,
8. Regular reporting on the energy goals and objectives in the facilities to the management, planning and implementation of the corresponding measures and activities.

### **Employee Responsibilities**

1. Making efforts to reduce or eliminate energy losses across factory operations,
2. Avoiding using unnecessary energy-consuming equipment for office work and production activities,
3. Understanding, complying with and supporting Karsan Automotive's general energy policies and practices
